

## Setting the context and introducing the activity

Mr. Uy Kamal

Deputy Head of the REDD+ Taskforce Secretariat

National Consultation Meeting on Assessment of  
Existing Benefit Sharing Models  
19 February 2014, Phnom Penh

# What Benefits?

Benefits from REDD+ is more than REDD+ revenue from reducing emissions of greenhouse gasses.

REDD+ is about protecting and using forests resources sustainable, land use planning, planting new forests etc.

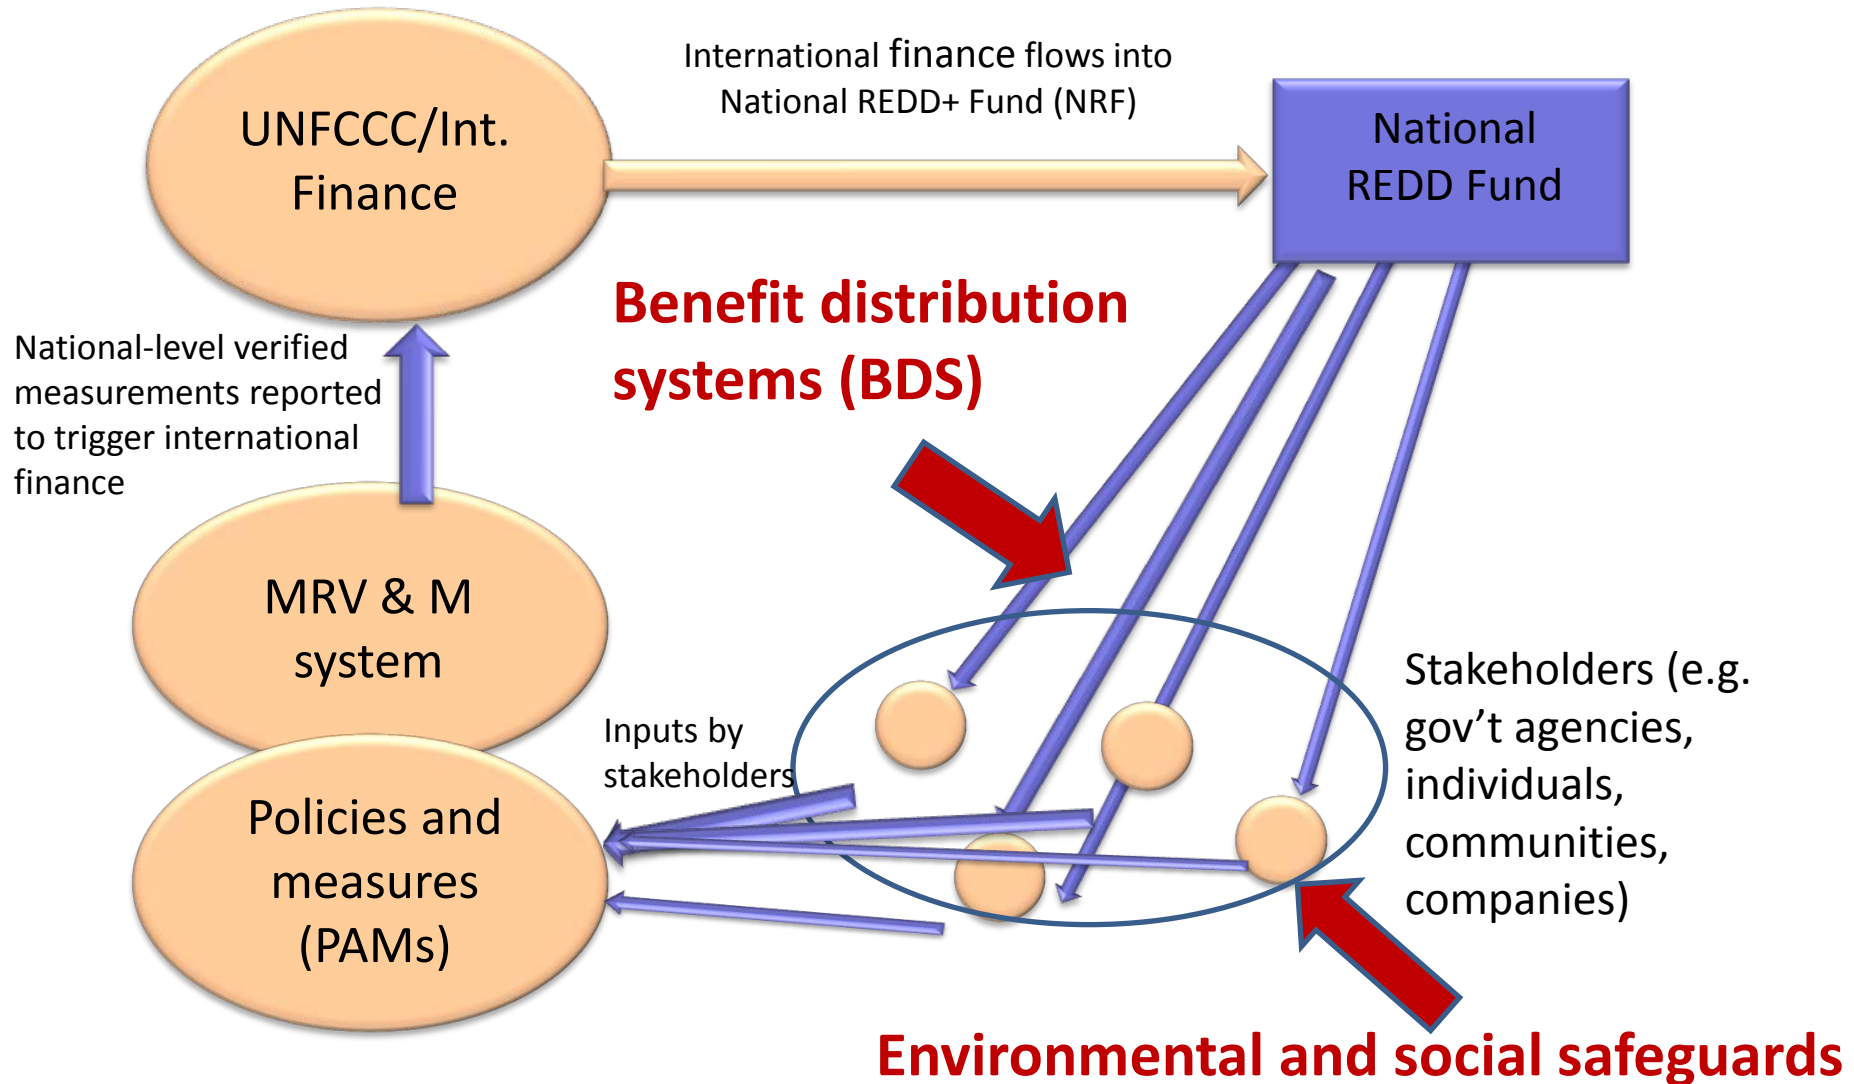

# What Benefits?

Forests provide livelihood opportunities, timber and non-wood forest products, protect water catchment areas and are stabilizing the local climate – these are all benefits for people living in and around the forests

But we also expect possible revenue from REDD+ results which can be used to support actions

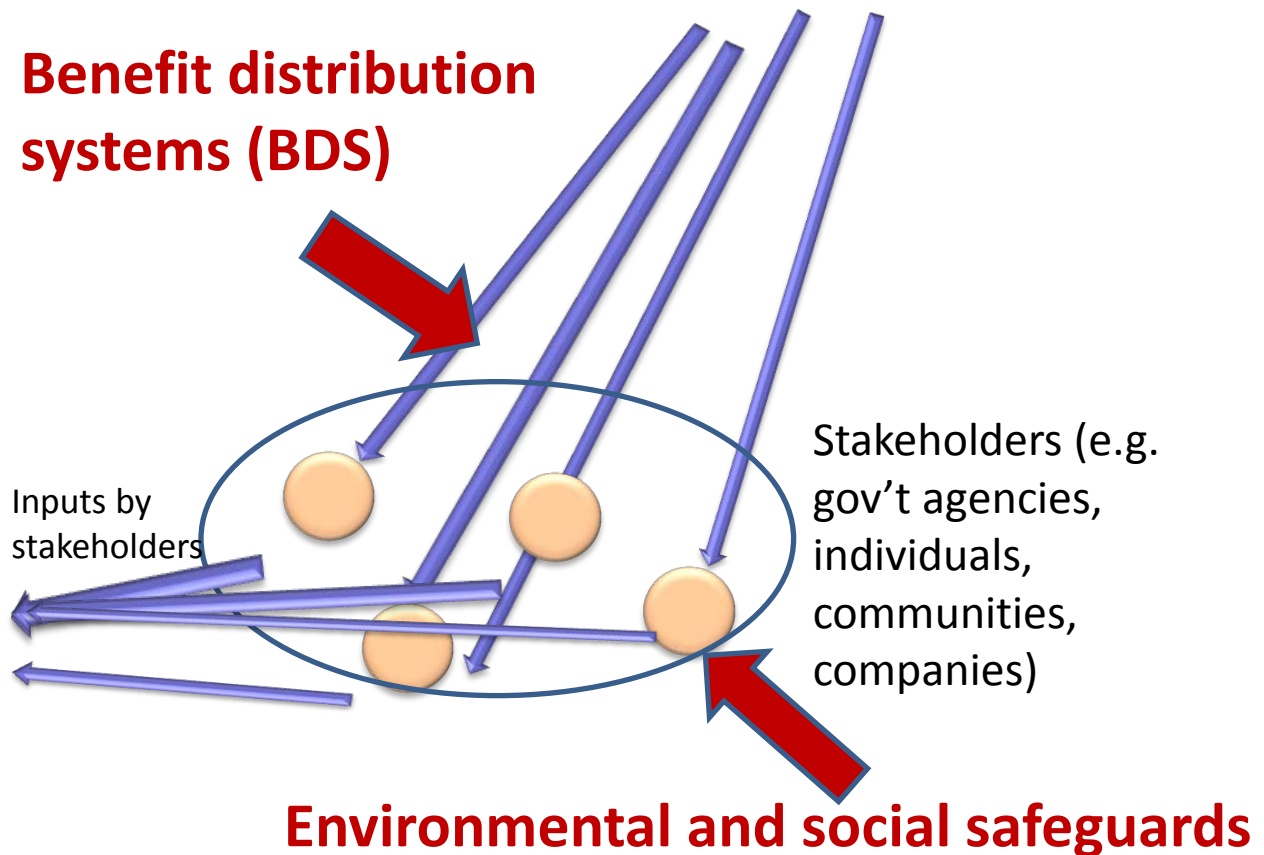

# National REDD+ system

# National REDD+ system

## Benefit sharing

# How can we provide REDD+ benefits to stakeholders

(monetary and non-monetary)

In a way which is effective, efficient and fair?

Some experiences with benefit sharing will be presented today

# Thank You!
