

CAMBODIA REDD+ PROGRAMME

COP decisions on drivers of deforestation and forest degradation

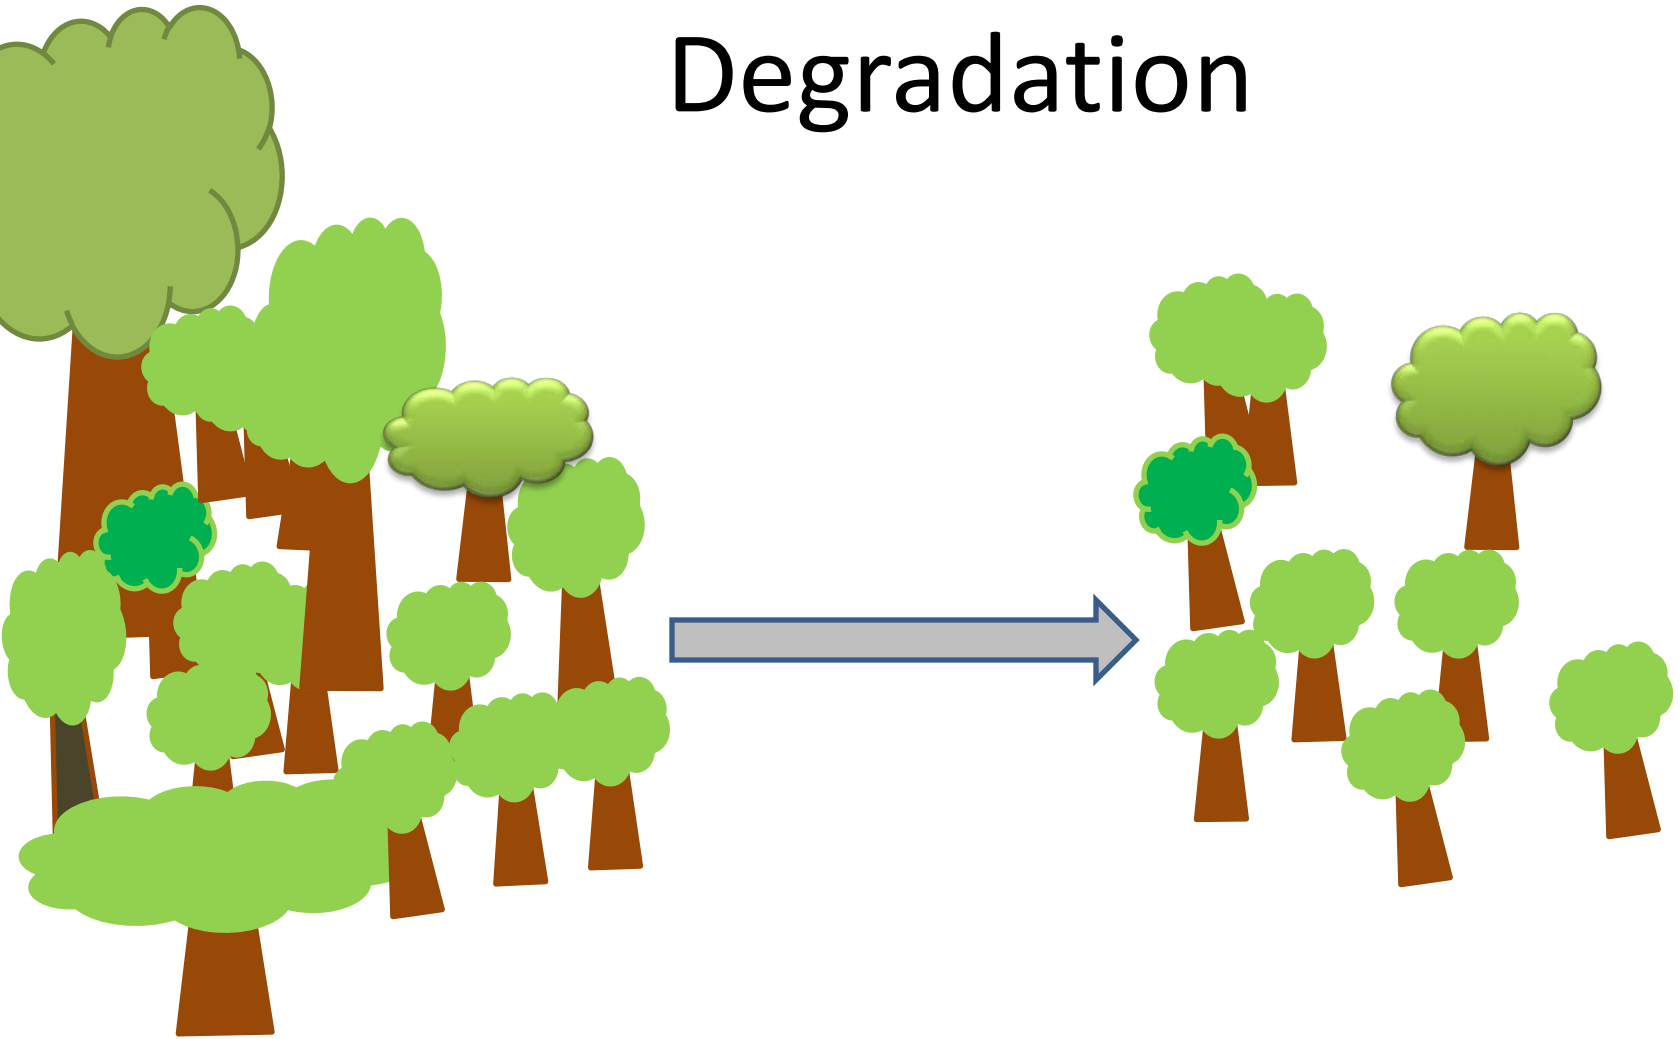

Peter Iversen, Technical Specialist

REDD+ Taskforce Secretariat

Workshop on Identifying Drivers of Deforestation and
Forest Degradation in Cambodia 6th March, 2014

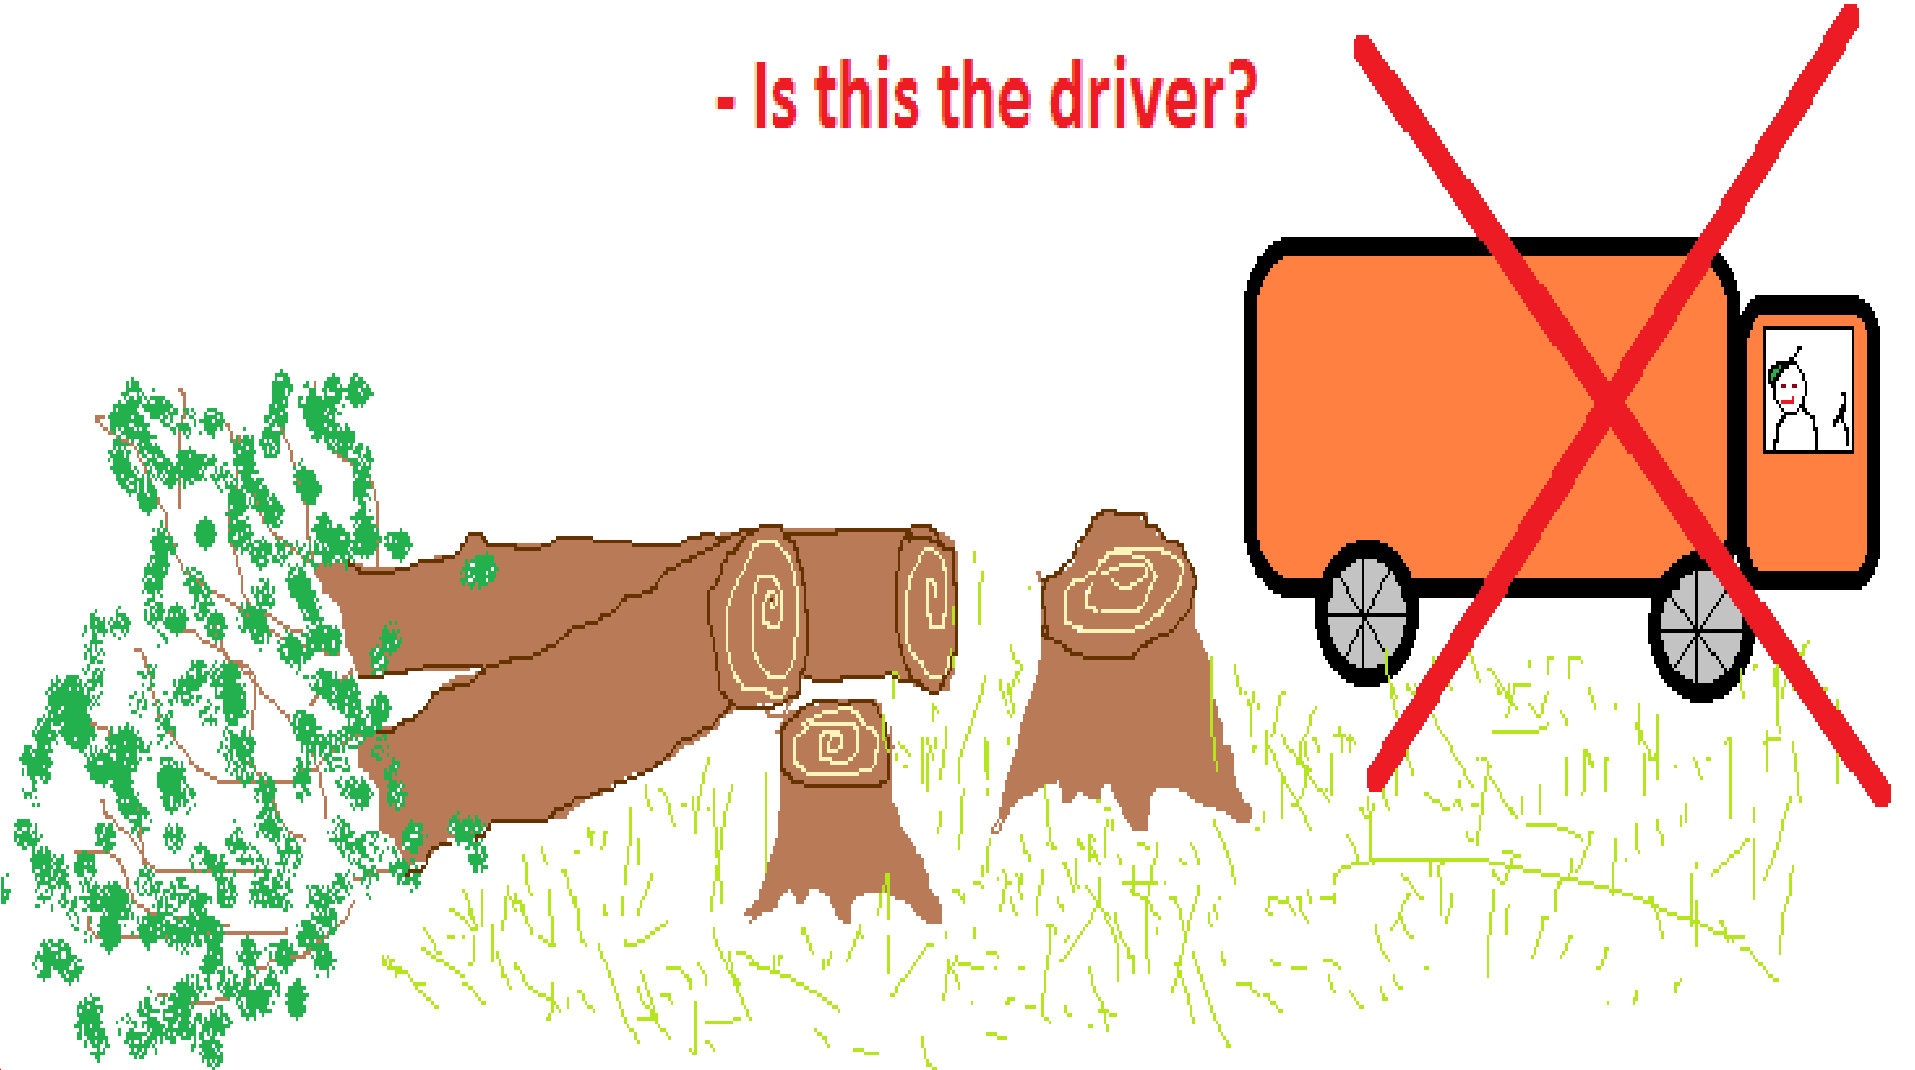

Degradation

Driver of Deforestation

- Is this the driver?

COP13 - Bali

3. Encourages countries to explore a range of actions, identify options and undertake efforts, including demonstration activities, **to address the drivers of deforestation relevant to their national circumstances**, with a view to reducing emissions from deforestation and forest degradation and thus enhancing forest carbon stocks due to sustainable management of forests;

COP15 - Copenhagen

1. Requests developing countries **to identify drivers of deforestation and forest degradation resulting in emissions and also the means to address these.**

COP16 - Cancun

68. Encourages **all Parties** to find effective ways to reduce the human pressure on forests that results in greenhouse gas emissions, including actions to address drivers of deforestation;

72. Also requests developing country Parties, when developing and implementing their national strategies or action plans, **to address, inter alia, the drivers of deforestation and forest degradation...**

COP19 – Warsaw

Decision 15 Addressing the drivers of deforestation and forest degradation

Notes the **complexity** of the problem, different national circumstances and the **multiple drivers** of deforestation and forest degradation and that **livelihood may be dependent on activities related to drivers of deforestation and forests degradation** and that addressing these drivers may have **economic costs and implications for domestic resources**

COP19 – Warsaw

1. Reaffirm the importance of addressing drivers of deforestation and forest degradation **in the context of the development and implementation of national strategies** and action plans by developing country Parties;
2. Recognize that drivers of deforestation and forest degradation have many causes, and that actions to address these drivers are unique to countries' national circumstances, capacities and capabilities;
3. **Encourage Parties, organizations and the private sector to take action to reduce the drivers** of deforestation and forest degradation;

COP19 – Warsaw

4. Encourages all Parties, relevant organizations, and the private sector and other stakeholders, to continue their work to address drivers of deforestation and forest degradation and **to share the results of their work** on this matter, including via the web platform on the UNFCCC website;
5. Encourages developing country Parties **to take note of the information from on-going and existing work** on addressing the drivers of deforestation and forest degradation by developing country Parties and relevant organizations and stakeholders.

In conclusion

Identifying and addressing the drivers are key for successful implementation of REDD+

The REDD+ Strategy should clarify how countries will do this

United Nation Framework Convention on Climate Change

Thank You!
